

NATUROPATHIC MEDICINE IS A PROFESSION—NATURALLY.

The public comment period to protect our profession is now **OPEN**.

Your voice is the only thing standing between earned recognition and being treated as **collateral damage**.

The Problem

The U.S. Department of Education is moving to narrow the definition of 'professional degree,' a shift that excludes the ND degree and threatens our professional standing.

The Risk

If finalized, ND students will lose the federal loans needed to complete their education, leading to fewer practitioners and limited care options for patients.
